

Step 1 : Find the velcro lined edge on the Gazebo back wall.

Step 2 : Holding the corner edge of the velcro strip carefully align to any inner velcro corner of the Gazebo.

Step 3 : Starting from the corner, align the rest of the velcro linings together by pressing down whilst keeping a pull on the back wall material with your other hand.

Step 4 : Grab the support straps and wrap around the pole making sure you velcro it securely.

Step 5 : Repeat step 5 on all 8 support straps, if the back wall is sagging then just gently twist the support straps around to tighten.

Step 6 : You should now have a great looking gazebo and back wall.
